

LAKEHEAD AMATEUR RADIO CLUB

Fort William - Port Arthur

MONTHLY BULLETIN

FEBRUARY
1952

Frank Start - VE3AJ
President

The next regular meeting of the Club will be held on Wednesday, February 27th, 8 pm in the RCAF building, Fort William.

The following are points discussed by your Executive and on which we would like an expression of opinion of the members at the meeting.

- (1) The possibility of holding a quiz programme at one of the meetings and what form it should take - not so much to test technical knowledge but to provide entertainment.
- (2) A.R.R.L. Field Day - Suggest a committee be appointed to construct a transmitter out of surplus gear and Club funds.
- (3) Annual Meeting - Scheduled for March, discussion as to whether new officers should take office after summer vacation or immediately after election in March.
- (4) Annual Meeting - Suggestion that it be a dinner meeting at the Lorna Doone or New York Lunch.

Programme at next meeting:

- Usual movies and
- Demonstration of Television Equipment by Bill Roberts - VE3ARN (picture doubtful) also a remote control device which is applicable for remote control of transmitters etc.

Band Conditions:

Conditions are about the same. There seems to be a slight improvement in 10 Metres. On twenty metres conditions are poor with the exception of an occasional day when stations come through for short intervals only to fade out before a QSO can be completed.

On February 21st, DX has been very good and nearly all Europe and Africa were represented on twenty phone. On forty and eighty conditions seen to be noisy due to QRN and the change in seasons.

Local on 75:

Frank Start - VE3AJ and Harry Stephens - VE3AIT are on about 7 pm every evening and would like to have local signals join in the QSO. AJ is on 3730 and AIT usually a little higher up.

73 fer nw
See you on Wednesday!
